

CONFIDENTIAL

3 June 1983

MEMORANDUM FOR:   
Assistant NIO/USSR-EE

STAT

FROM : Herbert E. Meyer  
Vice Chairman, NIC

1. As you know, many individual efforts are underway throughout CIA to track INF developments and Soviet reactions.

2. Let's create a working group of appropriate analysts to meet periodically to share ideas and information on this subject. The minutes of such meetings might serve as good bench marks of where we believe NATO deployment and Soviet reactions stand at any particular moment. Bringing together these analysts regularly should also make it easier to produce our forthcoming memo to holders on the SNIE on INF deployment.

3. Will you look into forming such a group and heading it up? At a minimum, it should probably include analysts from the AG, ACIS, EURA, and SOVA.

Herbert E. Meyer
